

Python JSON prelama string na ~157/158 stupcu i stavlja "newline" ("\n", "\x0A")

written by js | 2022-03-23

Umjesto..

```
print ( json.dumps ( podaci , indent=2 , ensure_ascii=False )  
, file = open ( "podaci.json" , "w" , encoding="utf8" ))
```

..koristi

```
fajl = open ( "podaci.json", "w" , encoding="utf8" )  
json.dump ( podaci , fajl , indent=2 )
```

python json dump dumps newline carriage return linefeed 0d 0a crlf novi red 157
