

Pogreška tijekom “./configure” faze kompajliranja (nekog prastarog programa?)

written by js | 2022-04-15

Problem

- checking host system type... Invalid configuration `x86_64-pc-linux-gnuoldld': machine `x86_64-pc' not recognized
- checking target system type... Invalid configuration `x86_64-pc-linux-gnuoldld': machine `x86_64-pc' not recognized
- checking build system type... Invalid configuration `x86_64-pc-linux-gnuoldld': machine `x86_64-pc' not recognized

Rješenje

Kopiraj neku moderniju datoteku “config.sub” odnekud (skini neki noviji .tar file i raspakiraj)

```
checkinghostsystemtype      Invalidconfiguration8664pclinuxgnuoldld
machinex8664pcnotrecognized      xcheckinghostsystemtype
xInvalidconfiguration8664pclinuxgnuoldld xmachinex8664pcnotrecognized
```
