

Autohotkey AHK Javna IP adresa + TSR

written by js | 2022-11-20

Ako rade, skripte bi trebale prijavljivati promjenu javne IP adrese. Korisno ako imaš VPN na routeru/gatewayu (posebno neki usrani tipa Mullvad ili TorGuard koji pucaju svakih 18 sekundi) da te obavijesti o pucanju i promjeni IP adrese. O VPN-killswitchu drugom zgomom.
