

Nextcloud instalacija nije konfigurirala Nextcloud

written by js | 2023-05-04

Problem 1

Otvoriš stranicu

`http://localhost/nextcloud/index.php/settings/admin/overview`

kadli odjednom ničim izazvana se pojavi crvena pogreška

The PHP memory limit is below the recommended value of 512MB

Rješenje 1

- `nano /etc/php/8.1/apache2/php.ini`

promijeni `memory_limit=neštonešto` u `memory_limit=512M`

- `nano /etc/php/8.1/cli/php.ini`

promijeni `memory_limit=neštonešto` u `memory_limit=512M`

- `sudo service apache2 restart`
-

Problem 2

PHP configuration option `output_buffering` must be disabled

Rješenje 2

- `nano /etc/php/8.1/apache2/php.ini`

kREMiraj `output_buffering`

- nano /etc/php/8.1/cli/php.ini

kREMiraj output_buffering

- sudo service apache2 restart
-

Problem 3

Your data directory and files are probably accessible from the internet. The .htaccess file is not working. It is strongly recommended that you configure your web server so that the data directory is no longer accessible, or move the data directory outside the web server document root.

Rješenje 3

- nano /etc/apache2/apache2.conf

promijeni

```
<Directory /var/www/>  
  Options Indexes FollowSymLinks  
  AllowOverride None  
  Require all granted  
</Directory>
```

u

```
<Directory /var/www/>  
  Options Indexes FollowSymLinks  
  AllowOverride All  
  Require all granted  
</Directory>
```

- sudo service apache2 restart
-

nextcloud xnextcloud nc xnc php xphp
