

# Imaš link na Outlook item ("outlook:1234abcd..."); kako ga otvoriti s "Run" ili "Start" ili sl?

written by js | 2023-06-29

Dodaj u Registry ovo:

## Za 32-bitni Outlook u 64-bitnim Windowsima

```
Windows Registry Editor Version 5.00
[HKEY_CLASSES_ROOT\Outlook]
    @="URL:Outlook Folders"
    "URL Protocol"=""
[HKEY_CLASSES_ROOT\Outlook\shell]
[HKEY_CLASSES_ROOT\Outlook\shell\open]
[HKEY_CLASSES_ROOT\Outlook\shell\open\command]
    @="\"C:\\Program Files (x86)\\Microsoft Office\\root\\Office16\\Outlook.exe\" /select \"%1\""
```

## Za 64-bitni Outlook u 64-bitnim Windowsima

```
Windows Registry Editor Version 5.00

[HKEY_CLASSES_ROOT\outlook]
    @="URL:Outlook Folders"
    "URL Protocol"=""
[HKEY_CLASSES_ROOT\outlook\DefaultIcon]
    @="\"C:\\Program Files\\Microsoft Office\\Office16\\OUTLOOK.EXE\" "
[HKEY_CLASSES_ROOT\outlook\shell]
    @="open"
[HKEY_CLASSES_ROOT\outlook\shell\open]
    @=""
[HKEY_CLASSES_ROOT\outlook\shell\open\command]
    @="\"C:\\Program Files\\Microsoft Office\\Office16\\OUTLOOK.EXE\" /select \"%1\""
```

# A kako izgleda makro kojim dobiješ Outlook URL?

```
Sub AddLinkToMessage2Clipboard()  
    Dim objMail As Outlook.MailItem  
    Dim doClipboard As New DataObject  
    If Application.ActiveExplorer.Selection.Count <> 1 Then  
        MsgBox ("Samo jedna stavka smije biti označena")  
        Exit Sub  
    End If  
    Set objMail = Application.ActiveExplorer.Selection.Item(1)  
    ' doClipboard.SetText "[[outlook:" + objMail.EntryID +  
    "][MESSAGE: " + objMail.Subject + " (" + objMail.SenderName +  
    ")]]"  
    doClipboard.SetText "outlook:" + objMail.EntryID  
    doClipboard.PutInClipboard  
End Sub
```
