

Windows backup - Error 0x8078011E 8078011E

written by js | 2023-07-02

Problem

Netom nakon početka backupa, minutu-dvije, pojavi se EventViewer error:

EventId 4104: The backup was not successful. The error is: Windows Backup failed to get an exclusive lock on the EFI system partition (ESP).

This may happen if another application is using files on the ESP.

Please retry the operation.

(0x8078011E).

EventID 517: The backup operation that started at 'YYYY-MM-DDThh:mm:ss.msZ' has failed with following error code '0x8078011E'

(Windows Backup failed to get an exclusive lock on the EFI system partition (ESP).

This may happen if another application is using files on the ESP. Please retry the operation.).

Please review the event details for a solution, and then rerun the backup operation once the issue is resolved.

Rješenje

Ponekad pomaže da pokreneš backup 2-3 puta za redom. Ipak su to kompjutori i ipak je to Microsoft, šta misliš da još uvijek u Microsoftu ima ljudi koji znaju šta se događa u računalima? Pffft...
