

Docker - !Pazi! Obriši sve i sva bez pitanja i opcije “unfuck”!

written by js | 2023-07-11

!Pazi!

Prvo pogledaj i potvrdi da želiš sve maknuti

- `docker image list`
- `docker ps`

Uništavaj!

- `docker stop $(docker ps -qa)`
- ako se pojavi poruka:
 - “Error response from daemon: conflict: unable to delete <%ID%> (must be forced) - image is being used by stopped container <%ID%>”
 - onda
 - `docker rm <%ID%>` pa tako sve redom
- `docker rmi $(docker images -q)`

destroy annihilate purge delete remove uninstall stop xdestroy xannihilate xpurge
xdelete xremove xuninstall xstop docker xdock containers xcontainers images
ximages all xall
