

PaperLess - Docker - Redis fuckery

written by js | 2023-07-11

Problem

- Failed to connect to redis using environment variable PAPERLESS_REDIS.
- Waiting for Redis
- Redis ping #0 failed
- Error: Error 110 connecting to broker:6379. Connection timed out
- Waiting 5s

...itd... i ostale bullshit random error poruke koje se događaju kad nemaju pojma šta se događa.

Rješenje

Probaj reboot.

Ako ne radi, probaj osobno instalirati “redis-tools” i “redis-server”.

paperlessngx xpaperlessngx docker xdocker redis xredis timeout xtimeout
