Instalacija ili nadogradnja Windows 11 je usrala Windows Explorer context menu, točnije “Show more options”

Problem

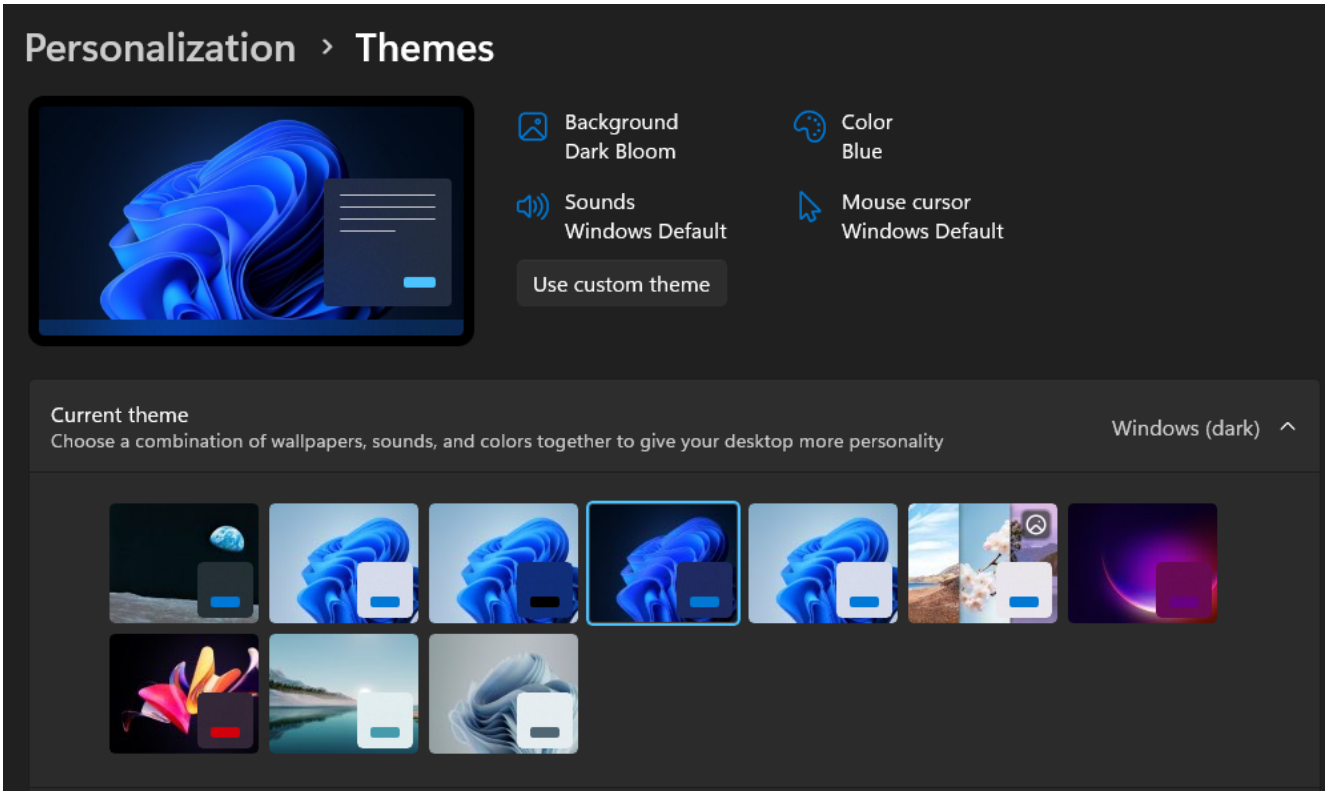

Windows 11 in dark mode, context "Show more options" in light mode

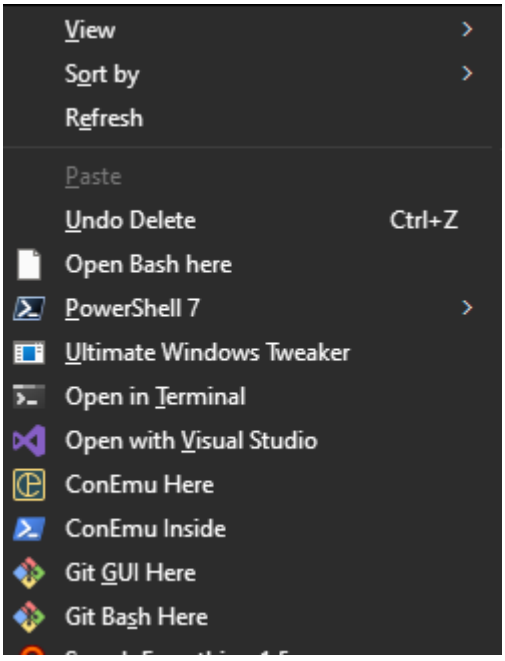

Rješenje

Apliciraj neku od Personalization >> Themes

Odaberi npr. temu “Plava Vulva” i primijeni je.

Usrane su ove teme dostupne po defaultu, ali barem možeš krenuti s normalnim kontekstualnim izbornikom:

Dodatak

Ova radnja riješila je i problem “prozora-duhova” (ghost window) – prozor aplikacije ostane otvoren (ili na desktopu ostane samo “sjena” na tom mjestu) iako je aplikacija zatvorena.
