

Hyper-V - Virtualization disabled

written by js | 2023-09-23

Problem

Pokreneš SystemInfo.exe i on kaže "Virtualization Enabled in Firmware: No"

Pokreneš Task Manager >> Performance: "Virtualization: Disabled"

Rješenje

Otvori BIOS i uključi jedno od sljedećih (Koje točno? Ovisi o mnogim čimbenicima. ASROCK koristi SVM):

- Intel Virtualization Technology
- IOMMU
- SVM

Razno

```
Hyper-V Requirements:      VM Monitor Mode Extensions: Yes
                          Virtualization Enabled In Firmware: Yes
                          Second Level Address Translation: Yes
                          Data Execution Prevention Available: Yes
```

```
Hyper-V Requirements:      A hypervisor has been detected. Features required for Hyper-V will not be displayed.
```

```
Base speed:                3,60 GHz
Sockets:                   1
Cores:                     6
Logical processors:        12
Virtualization:            Enabled
L1 cache:                  576 KB
L2 cache:                  3,0 MB
L3 cache:                  16,0 MB
```

hyper-v hi, perv hyperv virtualization
