

gpg cli cmd tl;dr

written by js | 2023-11-11

gpg kreiranje ključa RSA 4096 sve funkcije, nema rok trajanja

```
gpg --quick-gen-key <%ime.prezime@domena.tld%> rsa4096  
cert,auth,sign,encr never
```

gpg izvoz, privatni ključ

```
gpg --armor --export-secret-key <%ime.prezime@domena.tld%>
```

gpg izvoz, javni ključ

```
gpg --armor --export <%ime.prezime@domena.tld%>
```

gpg otisak ključa

```
gpg --fingerprint <%ime.prezime@domena.tld%>  
gpg --fingerprint =<%ime.prezime@domena.tld%> # upravo taj  
certifikat, ne matchaj
```

gpg uvoz ključa

```
gpg --import <%ime.prezime@domena.tld%>
```

gpg šifriraj datoteku

```
gpg --encrypt --armor --recipient <%ime.prezime@domena.tld%> -  
-output šifriranadatoteka.gpg gologuzadatoteka.txt
```

gpg dešifriraj šifriranu datoteku

```
gpg --decrypt šifriranadatoteka.gpg > rezultat.txt
```

gpg ultimate trust

```
echo -e "5\ny\n" | gpg --command-fd 0 --expert --edit-key  
<%FingerprintNečijegSecretKeya%> trust;
```

gpg izlistaj popis certifikata

```
gpg --list-keys  
gpg --list-secret-keys
```

gpg obriši certifikat

```
gpg --delete-secret-key UID  
gpg --delete-key UID
```
