

Powershell - Prikaži jednu vrijednost iz JSON datoteke

written by js | 2024-03-21

Struktura JSON datoteke

"" > Settings > Common > Proxy > Server > Address

(prvi entitet je prazan string)

powershell.ps1

```
$jsonFilePath = "efs_cfg_dump"
$jsonContent   = Get-Content -Path $jsonFilePath -Raw
$jsonObject    = ConvertFrom-Json -InputObject $jsonContent -
AsHashtable
$Value        =
$jsonObject[""].Settings.Common.Proxy.Server.Port
#           ...ili:                               $Value        =
$jsonObject[""]["Settings"]["Common"]["Proxy"]["Server"]["Port
"
Write-Output $Value
```
