

Zabbix “Incorrect user name or password or account is temporarily blocked.”

written by js | 2025-11-09

Zabbix 7 instaliran prema [instrukcijama](#)

First login: “Incorrect user name or password or account is temporarily blocked.”

Instrukcije ti ne kažu malu sitnicu da password mora biti BCryptiran.

```
php -r 'echo password_hash("YourPassword", PASSWORD_BCRYPT).PHP_EOL;'
```

Rezultat je HASH “\$2y\$10\$...” kojega upiši dolje namjesto HASH. To možeš učiniti za korisnike Admin i zabbix:

```
sudo mysql -u root -p
..
USE zabbix;
UPDATE users
SET passwd = 'HASH',
    attempt_failed = 0,
    attempt_ip = '',
    attempt_clock = 0
WHERE username = 'Admin' OR userid = 1;
UPDATE config SET authentication_type = 0;
```
