

Kreiranje točke “System Restore” {Powershell}

written by js | 2021-09-16

Tema

Kreiraj System Restore Point iz komandne linije / skripte.

Postupak - tl;dr

```
PS C:\> Invoke-CimMethod -Namespace root/DEFAULT -ClassName
SystemRestore -MethodName CreateRestorePoint -Arguments @{
    >> Description = (Get-Date).ToString()
    >> RestorePointType = [uint32]0
    >> EventType = [uint32]100
    >> }

ReturnValue PSComputerName
-----
0
```

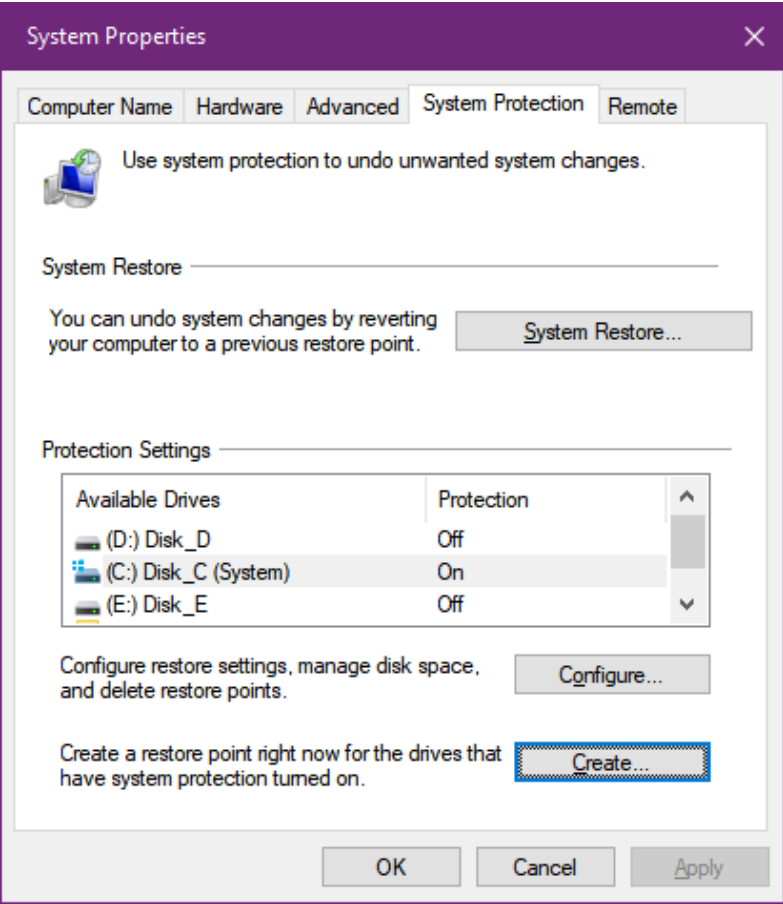

Ako se pojavi pogreška:

```
Invoke-CimMethod : The service cannot be started, either because it is disabled
or because it has no enabled devices associated with it.
At line:1 char:1
+ Invoke-CimMethod -Namespace root/DEFAULT -ClassName SystemRestore -M ...
+ ~~~~~
+ CategoryInfo          : ResourceUnavailable: (root/DEFAULT:SystemRestore:String)
                        [Invoke-CimMethod], CimException
+ FullyQualifiedErrorId : HRESULT
0x80070422,Microsoft.Management.Infrastructure.CimCmdlets.InvokeCimMethodCommand
```

Rješenje

Vjerojatno je Start → System Restore → Protection Settings isključen za sve diskove. Ta uključimo ga za barem jedan od diskova , “System”, (Sl.1) i ponovimo naredbu.
