

sendmail ne može koristiti SSL/TLS

written by js | 2021-09-19

Tema

Želiš koristiti sendmail za robote (“-o tls=yes -o username=mirko -o password=admin123”), kadliono sendmail ti javi:

```
$DATE $HOSTNAME sendmail[$RANDOM]: ERROR =>
No TLS support! SendEmail can't load required libraries.
(tr try installing Net::SSLeay and IO::Socket::SSL)
```

Postupak - tl;dr

- `sudo apt install sendmail libio-socket-ssl-perl -y`
