

# /etc/fstab - mount NTFS particije prilikom boota

written by js | 2021-11-14

## Tema

Želiš montirati NTFS USB disk prilikom reboota.

## tl;dr

- `sudo apt install ntfs-3g`
- `mkdir /mnt/uezbel`
- `sudo blkid#` zapiši UUID usb diska koji želiš mauntati
- `nano /etc/fstab:`
  - `UUID=1234ABCD5678EFGH /mnt/uezbel ntfs-3g  
auto,nofail,noatime,rw 0 0`
  - `UUID=12345678-1234-1234-1234-1234567890AB  
/var/www/html/vanjskidisk ext4  
defaults,discard,noatime,nodiratime,nofail,x-  
systemd.device-timeout=1s,errors=remount-ro 0 1`

---

mount xmount ntfs xntfs usb xusb
